## TrainWise® Crew Display

The TrainWise® Crew Display (DS15) is a touchscreen display which features a sleek industrial design for rail applications. Simple touch activation and ultra-bright backlight provide easy access to essential operational and maintenance information from a single location.

The DS15 is designed for easy installation and integration with the train's Ethernet network and onboard subsystems. It operates over a wide range of voltages to support different train types without an external power supply.

**Total units ordered/delivered:** 4,100

### Key benefits

**Sunlight readable.** Up to three times brighter than standard consumer tablets.

**Rugged.** Impact, water, and scratch resistant.

**Intuitive user interface.** Provides rapid access to on-train status and fault conditions.

**Flexible.** The graphical user screens, application software, and vehicle interface can be tailored for any project.

### Main characteristics

- » Elegant floating-glass design
- » Capacitive touchscreen works with gloved hands
- » Brightness as high as 1000 nits
- » Automatic/manual brightness adjustment
- » Runs multiple applications simultaneously
- » Two display sizes (10.4" and 12.1")
- » Compliant with IEEE and IEC60571/EN50155
- » Secure web server provides remote access (PTE/BTE, operations, etc.)
- » Redundant Ethernet connections to car network
