

Quester Tangent

We are expanding our rail transit electronics business and are looking for an individual to work hard and share in our success. We have a strong track record of bringing innovative monitoring, diagnostics, and control electronics to the urban rail transit and marine market places. Come join us!

Established in 1983, Quester Tangent is a privately owned, Canadian corporation and a designer and manufacturer of software products and hardware systems that allow users to acquire, monitor, validate and process large amounts of data in either historical or real-time. While the application of the technology is ideal for any industry requiring data handling and supervised or unsupervised processing capabilities, the company's two current key markets are transit electronics and marine sciences. To date, Quester Tangent has sales in over 30 countries.

Production Technologist

Reporting directly to the Production Supervisor, the **Production technologist** is an integral component of Quester Tangent's transit and marine product manufacturing. **The focus of this position is the ability to assemble, test, troubleshoot, repair and failure analysis of mechanical, electrical and software based products.**

- Qualifications and Experience required:
- Minimum two years experience as a production technologist.
- Diploma or degree in Electronics Technology or Electrical engineering from a recognized institution.
- The ability to troubleshoot and repair complex circuits.
- Significant experience in high reliability soldering.
- General knowledge of production techniques, standards, quality control principles and practices.
- Commitment to high standards of workmanship and attention to detail.
- WHMIS Certification.

Only candidates selected for an interview will be contacted. Thank you for your interest.
