TrainWise® Crew Display

The TrainWise® Crew Display (DS15) features the latest design in the rail transit industry and superior data presentation. Powerful user control through the bright, touchscreen interface provides access to essential operational data and detailed maintenance information in a single location.

The DS15 is designed for easy installation and integration with the train's Ethernet network and onboard subsystems. It operates over a wide range of voltages for direct connection to the vehicle's low-voltage system.

Total units ordered/delivered: 4,000

Key benefits

Rugged. Impact, water and scratch resistant.

Flexible. The Display's graphical user interface, application software, and vehicle interface can be tailored to support new or modernization projects.

Sunlight readable. Up to three times brighter than standard displays on consumer tablets.

Intuitive user interface. Provides rapid access to on-train status and fault conditions.

Main characteristics

- » Elegant floating glass design
- » Touchscreen sensitivity adapts to work with gloved hands
- » Brightness as high as 1200 nits
- » Automatic/manual brightness adjustment
- » Runs multiple applications simultaneously
- » Tailored display sizes and optional touchscreen anti-graffiti laminate
- » Compliant with IEEE and IEC 60571/EN 50155
- » Secure web server providing remote access (PTE/BTE, operations, etc.)
- » Redundant Ethernet connections to car network
