TrainWise® Infotainment Display

The TrainWise® infotainment displays (DS17) present a rich selection of content using super-bright LCD technology specifically adapted for the rail-transit environment. The displays are ruggedly designed and come in a variety of sizes that fit almost every installation requirement including wall, ceiling, over door and bulkhead mounting.

These infotainment displays are equally suitable for retrofit into existing cars and for new vehicle procurements. The infotainment displays are designed for easy installation and integration using Quester Tangent's innovative Ethernet network system.

Key benefits

Fits any location. Quester Tangent can provide customized LCD displays in multiple sizes for any location including stretch displays for over-door and ceiling mounts.

Multimedia. Display content includes pictures, videos, scrolling text, live streaming content and special passenger announcements.

Targeted content. Multimedia content controlled from the Passenger Information Server (PC08) can be coordinated with train location and upcoming stations.

Revenue generating. Integrates with billing system to report the time and location when commercial advertisements are played.

Main characteristics

- » Superior visibility under all lighting conditions
- » Compliant with IEEE and IEC60571/EN50155 standards
- » Ethernet connected for simplified wiring and easy integration with onboard networks
- » Fully-configurable multimedia content
- » Operates over a wide range of voltages for connection directly to the vehicle low-voltage system
