

## Project Engineer

The talented team at **Quester Tangent** is growing, and they have an exciting opportunity for a **Project Engineer** to join their collaborative team in Victoria, BC. If you bring experience leading the technical execution of complex engineering projects, enjoy working at the intersection of engineering and project delivery, and have a strong ability to guide multidisciplinary teams while engaging directly with clients, you may be the Project Engineer we are seeking.

**Quester Tangent** is a highly respected and growing Canadian company serving international markets for more than 30 years, providing an innovative range of products and services. They offer flexible, modular, scalable electronic products to rail vehicle manufacturers and transit authorities that enable the efficient movement of people and goods. Their working environment fosters creativity and encourages innovation, while allowing their staff to balance their personal and professional lives. You will be joining a cohesive team that strives for excellence and one that is united by shared corporate values.

### What makes Quester Tangent a great employer?

They offer many benefits and rewards, and here is a sampling of what you can look forward to when you join their team:

- A full-time, permanent position with competitive compensation of \$95,000 - \$110,000 per year (subject to relevant skills, related experience, and education).
- A Monday to Friday, 8:00 am – 4:30 pm hybrid role with 3 days per week required in office.
- Comprehensive benefits coverage including health, dental, AD&D, and life insurance after 3 months of employment.
- Paid vacation, one personal day per calendar quarter, and a healthy work/life balance.
- A dedicated parking spot.
- A collaborative and rewarding team culture.
- Opportunities to learn and build your skills in the latest technologies and equipment.

### What could your day as a Project Engineer hold?

Working in close partnership with a Project Manager, the Project Engineer is responsible for leading the technical planning and execution of projects, ensuring successful delivery from concept through to completion. Acting as the technical lead, you will guide engineering efforts, support integration, and represent the organization in technical discussions. More specifically, you will:

- Lead the technical planning, coordination, and execution of engineering product development and delivery projects.
- Support project success by contributing to schedules, budgets, and scope management from a technical perspective.
- Coordinate technical activities including effort estimation, task assignment, and progress tracking.
- Develop, manage, and monitor Engineering Work Orders.
- Review, coordinate, and approve engineering deliverables including documentation, drawings, testing, and requirements.

- Lead technical discussions with clients, suppliers, and internal stakeholders, including participation in design reviews.
- Support system integration efforts and ensure alignment between design, requirements, and delivery.
- Monitor project progress, identify risks, and resolve technical challenges to keep projects on track.

This is only a small sampling of what your day may hold. Please be sure to review the full [Job Description](#).

### **Our ideal Project Engineer brings:**

- A Bachelor's degree in Electrical, Software, or Computer Engineering, or equivalent, and PMP certification or formal project management training is an asset.
- Proven experience leading or coordinating technical projects and working with multidisciplinary engineering teams.
- Strong background in project-based technical leadership within software, electronics, or related high-tech environments.
- Experience with planning, organizing, and executing complex technical work.
- Familiarity with cybersecurity strategies, networking, or IT systems is considered an asset.

### **Additional Skills and Abilities that will help you thrive in the role:**

- Strong communication skills with the ability to synthesize and convey complex technical information clearly.
- Excellent organizational and time management abilities.
- Ability to lead, collaborate, and build strong working relationships with internal and external stakeholders.
- A proactive, solutions-oriented mindset with strong problem-solving capabilities.
- Ability to balance technical detail with broader project objectives.
- Comfortable working in a dynamic environment with evolving priorities and minimal supervision.

### **We would love to hear from you!**

After reviewing the full [Job Description](#), please forward your resume that clearly outlines your related experience and skillsets to [TallSky Consulting](#). We look forward to receiving your confidential application!

This position will remain open until it is filled. We thank all applicants; however, after the initial acknowledgement, only those selected for further consideration will be contacted.
